

Altek Calibration Kits mV, V, mA, T/C and RTD

New—HART Smart Kit Model 546

- Two-Packs of Application-Specific Calibrators
- Portable, Battery Powered
- Soft-Sided Carrying Case

Five Kits Cover T/C, RTD, mA, V, and Frequency

These convenient kits are designed to make it easy and quick to calibrate certain types of instruments in the field, and cover nearly any electronic process, temperature, frequency, or milliamp flow signal. Applications include systems, instruments, computers, transmitters, controllers, dataloggers, flowmeters, and many more.

Each application-specific kit contains two highly accurate, compact, handheld calibrators that source, simulate, and read signals.

Each Unit Includes: 9V alkaline batteries (4671E), case, three-year warranty, and instruction manual.

ORDERING INFORMATION

TN533	J, K, T, E, T/C and RTD Calibrators (4669T/4363T)
TN545	RTD and Milliamp Calibrators (4363T/4353E)
TN546	RTD and mA for HART Transmitters (434E/311A)
TN556	J, K, T, E, T/C and Milliamp Calibrators (4669T/4353E)
TN569	Milliamp and Voltage Calibrators (4353E/3333E)
TN575	Frequency and Milliamp (4353E/5500E)
TN3334E	120V Adapter
