

## **Smart Electricians Use Circuit Siren™!**

Now you CAN be in two places at once!

**Electrical  
Automotive  
Marine  
Appliances  
Air Conditioning  
Irrigation  
Toys  
Hobbies  
Circuit Boards  
Alarm and Security  
Electric Motors  
Electrical  
Maintenance  
Landscape Lighting  
Industrial**

- No more struggling to hold leads on the work while also having to read a meter!
- No more yelling and screaming across a house!
- Circuit Siren™ pays for itself every time it is used!
- Now you can “hear the power” throughout an appliance or circuit!

Use the main  
unit with any  
combination of  
included  
adapters  
**HANDS-FREE**  
to hear  
electrical flow  
as it comes  
and goes !

## **Circuit Siren™**

**simply makes electrical power presence testing  
faster, easier, and safer!**

*Here's how it works:*

**Circuit Siren™ main unit with included adapter set  
attaches directly to:**

- 3 prong 120 volt 15 or 20 amp receptacles
- 2 prong 120 volt 15 or 20 amp receptacles
- Standard light bulb sockets
- Bared wires
- Any conductive surface that an insulated alligator clip can clip to
- Continuity adapter also included

Upon circuit voltage contact, **Circuit Siren™** emits a constant high pitched sound that can be heard through walls, floors, and windows. This makes it ideal for locating circuit breakers throughout a home or small building. The best part is that it works on AC or DC voltages between 3 and 130 volts. This will allow you to use **Circuit Siren™** on just about everything! Now you can perform complex testing tasks- all by yourself, without the need for assistance, as long as you have a **Circuit Siren™!**

Included Adapter Set  
3-130 Volt AC/ DC Range  
Continuity Siren  
LED Polarity Indication  
High/ Low Volume Switch  
Fits Comfortably In Pouch
