

# After millions of pairs, we're still finding ways to make them better.

New nickel-chrome finish looks better and provides improved corrosion resistance compared to ordinary lacquer-coated pliers

New forged alloy steel construction—spring tempered for strength and durability with less weight

New design wire cutter is deeper to capture the wire better and is positioned closer to the joint to reduce required cutting effort

New low-profile riveted joint is stronger and helps maintain close tolerances for superior cutting and gripping performance

## Refined and improved for maximum strength, durability and performance.

Two of the many improvements made to the latest generation of Crescent® brand slip joint pliers are a new nickel-chrome finish for unsurpassed corrosion resistance and stronger, more durable wire cutters. Add these latest advances to other features like our patented bias-cut gripping teeth and you have a line of pliers that can carry the Crescent® brand name proudly. For performance and durability in hand tools, you can depend on—Crescent®.

Small land at nose tip adds strength and reduces chipping when pulling

Sharp bias-cut gripping teeth bite in to hold better for more turning power

Catalog Number	Description
G24CV	4" Motor Kit Combination Slip Joint Pliers, Cushion Grip, Carded
