

H-S

The H-S is a low voltage microprocessor based humidity transmitter with a LCD display and voltage output. This transmitter is ideal for monitoring indoor humidity application and HVAC applications where both a display and a voltage output is desired. Options: Temperature sensor to monitor ambient conditions and programmable relay contacts are available.

Features:

- Large LCD showing humidity reading or set point
- Proven humidity sensor with extraordinary performance in repeatability and durability
- User friendly installation/ replacement with plug-in electronic module and base plate.

Measurement range:	10-95% RH
Operating Temperature:	5°C to 50°C*
Control Range:	10-95% RH
Power requirement:	24Vdc or 24 Vac
Accuracy @ 25C:	+/- 2% RH from 30-80%
Repeatability:	+/- 0.3% RH
Outputs	0-10V
Sensor Stability:	+/-1% @ 50 % RH, 5 yr
Temp Effect	0.05%RH/°F
Enclosure	ABS
