Simultaneous high-speed measurement of internal resistance and battery voltage

From large-cell to high-voltage battery testing - HIOKI is The Choice

The BT3563, BT3562, and 3561 BATTERY HiTESTERs support simultaneous high-speed measurement of internal resistance (IR) and battery voltage (OCV) for the ever-expanding production lines of increasingly larger lithium-ion low resistance batteries, and other battery packs for high voltage applications.

- Measure high-voltage battery packs up to 300V (with the BT3563)
- Ideal for high-precision cell voltage measurements (accurate to 0.01% of reading)
- Measurement circuitry employs enhanced current regulation
- Fast 10 ms response and 8 ms sampling time for high-speed measurements (with the BT3563 and BT3562)
- Ranges from 3 mΩ to 3000 Ω (with the BT3563 and BT3562) support coin-size to large-cell batteries
Resistance and voltage measurements

BATTERY HiTESTER BT3563
BT3562
3561

Measurement Parameters and Applications

- High-voltage battery pack testing
- Battery module testing
- Large (low-resistance) cell testing
- High-speed mass production testing of coin batteries
- Fuel cell stack measurements
- Battery research and development measurement applications

BATTERY HiTESTER BT3563
BT3562

Voltage measurement ranges:
- BT3563: 6V/60V/300V
- BT3562: 6V/60V

Resistance measurement ranges:
- BT3563: 3mΩ/30mΩ/300mΩ/3Ω/30Ω/300Ω/3000Ω
- BT3562: 3mΩ/30mΩ/300mΩ/3Ω/30Ω/300Ω/3000Ω

Lithium-Ion and Secondary Batteries

Battery-Powered Devices

- Cell phones
- E-books
- Electric bicycles
- Electric scooters
- EV/HEV

Advanced Functions

- Four-Terminal AC Method
  The four-terminal, 1-kHz AC method uses four contact probes to measure resistance independently of that of the measurement leads.

- Measurement Error Detection
  Detects test probe contact failure and broken leads, for 100% measurement reliability.

- Self-Calibrating
  Minor drift and gain fluctuations within the internal measurement circuitry are automatically corrected to maintain high accuracy.

- Averaging Function
  Stable readings can be consistently obtained by averaging two to 16 measurements.
to confirm finished quality

### Features of Battery HiTester Series

#### High Precision

- **Resistance**
  - ±0.5% rdg. ±5 dgt.
- **Voltage**
  - ±0.01% rdg. ±3 dgt.

  Common to the BT3563, BT3562 and 3561

#### High Resolution

- **Resistance:** 0.1 μΩ<sup>*</sup><sup>1</sup>
  - (3 mΩ range)
- **Voltage:** 10 μV<sup>*</sup><sup>1</sup>
  - (6 V range)

<sup>1</sup> BT3563 and BT3562

#### Quick Response

- **Resistance & Voltage Simultaneous measurements within 18 ms<sup>»</sup><sup>2</sup>

<sup>2</sup> Sampling time + response time: with EX.FAST sampling, BT3563 and BT3562

- Provides high-speed measurement of high-voltage<sup>3</sup> battery packs, for improving productivity (BT3563).

<sup>3</sup> BT3563: up to 300V
BT3562: up to 60V

---

### Measurement Parameters and Applications

- For high-speed production line testing of small battery packs for mobile and portable communications devices
- For high-speed production line testing of small cells
- High-speed 10ms inspection in the 300mΩ and 3Ω ranges
- Improve inspection efficiency during mass production of compact cells

#### Lithium-Ion and Secondary Batteries

- Cell phones
- E-books

#### Battery-Powered Devices

Voltage measurement ranges: 20V
Resistance measurement ranges: 300mΩ/3Ω

#### Quick Response with small cell measurement

- **Resistance & Voltage Simultaneous measurements within 10 ms<sup>»</sup><sup>4</sup>

<sup>4</sup> Sampling time + response time: with EX.FAST sampling, 3561

---

### BATTERY HiTESTER 3561

- Provides high-speed measurement of high-voltage<sup>3</sup> battery packs, for improving productivity (BT3563).

<sup>3</sup> BT3563: up to 300V
BT3562: up to 60V

- Provides high-speed measurement of high-voltage<sup>3</sup> battery packs, for improving productivity (BT3563).

<sup>3</sup> BT3563: up to 300V
BT3562: up to 60V

---

### Battery HiTester Series

- **Measurement Value Storage**
  - Store up to 400 measurement values by external trigger input, for bulk transfer to a computer.
- **Statistical Calculations**
  - Apply statistical calculations to up to 30,000 data points to facilitate process and quality control.
- **Save Measurement Setting Configurations**
  - Up to 126 measurement configurations such as comparator setting criteria can be saved and reloaded. Saved configurations can be selected by external control.
Automatic Testing Lines

■ High Speed Interfaces
The fastest 10 ms measurement data can be transferred via the standard RS-232C interface at up to 38,400 bps. Models with the -01 suffix include a GP-IB interface.

■ Handler Interface
Triggering, measurement configuration loading, and zero adjustment can be externally controlled. Output signals provide comparator results, end-of-measurement events, and measurement errors. (Because the BT3563/BT3652 are different from the 3561, consult each model’s Instruction Manual for specific details or designs.)

* The input and output signals of the BT3563 and BT3562 are isolated via photocouplers.

■ EXT I/O Connectors (BT3563 and BT3562, accessories not supplied)
Installed connector (HiTester side): 37-pin D-SUB accepts #4-40 screws
Mating connectors: 37-pin D-SUB accepts #4-40 screws
DC-37P-ULR (solder type) or DCSP-JB37PR (welded type) from Japan Aviation Electronics Industry, Ltd., or equivalent

■ EXT I/O Connectors (3561, accessories not supplied)
Installed connector (HiTester side): 57RE-40360-730B (D29) (DDK)
Mating connectors: 57RE-40360 (DDK), RC30-36P (Hirose Electric Co., Ltd.), or equivalent

■ Comparator Functions
- Judges Resistance & Voltage Simultaneously
  Resistance and voltage can be simultaneously judged Hi/IN/Lo by independent comparators. Judgment results are provided on the display, beeper, and external I/O. The display allows confirming both results at a glance.

- Composite Judgment Result Output
  External I/O provides both separate and combined outputs of resistance and voltage judgment results, so composite results can be monitored.

- Alternative Setting Methods
  Set judgment thresholds by specifying high/low (Hi/Lo) values or by specifying a standard value and deviation (%).

- Manual Comparator
  Comparator judgments can be executed only when required, supporting flexible control by footswitch or PLC.

- Dual Beep Tones
  Different beep tones distinguish IN and Hi/Lo judgments. Both tones can be independently enabled or disabled.
Multiple Recording Methods

**Analog Output** (BT3563-01 and BT3562-01 only)

The BT3563-01 and BT3562-01 provide analog output of resistance measurement values. This is convenient for combining recorded data from multiple locations or of various data types, such as for logging long-term measurements and for fuel cell evaluation.

<table>

</table>

**PC Application Program**

Measurement data can be transferred to a PC for importing to a spreadsheet program or storage as CSV files. Interval and manual measurements can be triggered by a keystroke or external trigger signal.

Download the PC application program from our website:
http://www.hioki.com/

**Data Printing**

Measurement values, and those including judgment results and statistical calculation results can be printed using an RS-232C-compatible printer.

- **Interval Printing**
  Elapsed time and measurement values can be printed over a specified interval. The interval can be set from 1 to 3,600 seconds.

- **Requirement specification (printer)**
  The requirements for a printer to be connected to the instrument are as follows. Confirm compatibility and make the appropriate settings on the printer before connecting it to the instrument.

<table>
<thead>
<tr>
<th>Interface</th>
<th>RS-232C</th>
</tr>
</thead>
<tbody>

</tbody>
</table>

ASCII data will be sent from the BT3563/BT3562/3561. Please use a printer that can output plain text.

For the RS-232C cable, the connector at the instrument end should be a molded type. The metal type (with hooks preventing the surface from being flat) will not fit due to the instrument's design.
Specifications

**BT3563, BT3562 and 3561 Specifications**

### Measurement types
- Resistance and voltage

### Resistance measurement method
- Four-terminal AC (1 kHz) method

### Functions
- \( \Omega V, \Omega \) and \( V \)

### Rated voltage
- **[BT3563(-01)]**
  - \( \pm 300 \text{ VDC} \) rated input voltage
  - \( \pm 300 \text{ VDC} \) maximum rated voltage to ground
- **[BT3562(-01)]**
  - \( \pm 60 \text{ VDC} \) rated input voltage
  - \( \pm 70 \text{ VDC} \) maximum rated voltage to ground
- **[3561(-01)]**
  - \( \pm 22 \text{ VDC} \) rated input voltage
  - \( \pm 70 \text{ VDC} \) maximum rated voltage to ground

### Input resistance
- **[BT3563(-01) and BT3562(-01)]**
  - 3 m\( \Omega \)/30 m\( \Omega \)/300 m\( \Omega \) ranges: Approx. 90 k\( \Omega \)
  - 3 \( \Omega \)/30 \( \Omega \)/300 \( \Omega \)/3000 \( \Omega \) ranges: Approx. 1 M\( \Omega \)
- **[3561(-01)]**
  - Approx. 1 M\( \Omega \)

### Sampling rate
- Four steps – Extra Fast, Fast, Medium or Slow

### Response time
- **[BT3563(-01) and BT3562(-01)]**
  - Approx. 10 ms for measurements
  - Note: Response time depends on reference values and the measurement object.
- **[3561(-01)]**
  - Approx. 3 ms for measurements
  - Note: Response time depends on reference values and the measurement object.

### Total measurement time
- Sampling time + Response time

### Zero-adjustment
- 1000 count range (both resistance and voltage)

### Triggering
- Internal or external

### Delay time
- On/off, 0 to 0.999 seconds

### Averaging samples
- On/off, 2 to 16 samples

### Statistical calculations
- Total data count; valid data count; maximum, minimum and average values; standard deviation; population standard deviation and process capability indices

### Measurement value output function
- Measurement values are output via RS-232C upon trigger input

### Measurement value memory
- Up to 400 measurements

### Panel save/load
- Up to 126 configuration settings

#### Save Frequently Used Settings in Memory:
- Measurement function, resistance measurement range, auto-range setting, zero-adjust setting data, sampling rate, trigger source, delay setting, averaging and comparator settings, statistical calculation setting, display switching and key-lock.

### Analog Output
- **[BT3563-01 and BT3562-01 only]**
  - Measured resistance (displayed value, from 0 to 3.1 VDC)

### External interface
- Internal or external
- RS232C (9600, 19200 or 38400 bps), Printer RS-232C (all models), GP-IB (Model BT3563-01, BT3562-01 and 3561-01 only)

### Other functions
- Over-range display, measurement error detection, self-calibration, dual comparators, key-lock

### BT3563, BT3562 and 3561 General Specifications

#### Operating temperature & humidity
- 0 to 40°C, 80% rh or less (non-condensating)

#### Storage temperature & humidity
- -10 to 50°C, 80% rh or less (non-condensating)

#### Guaranteed accuracy temperature & humidity
- 23°C ±5°C, 80% rh or less (non-condensating)

#### Operating conditions
- Indoors, below 2000 m ASL

#### Rated supply voltage
- 100 to 240 VAC (auto-selecting)

#### Rated supply frequency
- 50/60 Hz

#### Rated power consumption
- 30 VA

#### Insulation withstand potential
- **[BT3563(-01), BT3562(-01)]**
  - 1.39 kV AC for 15 s (with 10 mA cut-off current) between all mains supply terminals and protective ground terminal
  - 2.224 kV AC for 15 s (with 1 mA cut-off current) between all measurement jacks and interfaces
  - 1.39 kV AC for 15 s (with 1 mA cut-off current) between all measurement jacks and protective ground terminal
- **[3561(-01)]**
  - 1.69 kV AC for 15 s (with 10 mA cut-off current) between all mains supply terminals and protective ground, interfaces, and measurement jacks

#### Dimensions
- Approx. 215W × 80H × 295D mm (without projections)

#### Mass
- Approx. 2.4 kg

#### Accessories
- Power Cord (1)

#### Applicable Standards
- Safety
  - EN61010-1
- EMC
  - EN61326
  - EN61000-3-2
  - EN61000-3-3

### BT3563 and BT3562

### Measurement Ranges and Accuracy

#### BT3563, BT3562 and 3561

**Conditions of Guaranteed Accuracy**

Temperature & humidity:
- 23 °C ±5 °C, 80% rh or less (non-condensating)

Zero-adjustment: After executing zero-adjustment warm-up time: At least 30 min.

Self-calibration:
- Unless using SLOW sampling, execute self-calibration after warm-up and restrict temperature fluctuations to within ±2 °C after calibration.

<sup>6</sup> Add ±3 dgt. for EX FAST, or ±2 dgt. for FAST and MEDIUM

#### About Accuracy

Accuracy is calculated from the reading error (±% rdg.) determined by the measurement value and range, and the digit error (± dgt.).

**Calculation Example**

Measurement value: 1 Ω, Measurement range: 3 Ω

Specified accuracy (from table below): ±0.5% rdg., ±5 dgt.

(A) Reading error (±% rdg.): 1 Ω × 0.5% = ±0.005 Ω

(B) Digit error (± dgt.): ±5 dgt. = ±0.0005 Ω (at 0.0001 Ω resolution)

(C) Total error (A + B): ±0.0055 Ω

Applying total error (C) to the measurement value of 1 Ω gives an error limit of 0.9945 to 1.0055 Ω.

Options (measurement leads)

Measurement lead (for measuring high voltage batteries with Models BT3563 and BT3562)

PIN TYPE LEAD L2100
A:300 mm, B:172 mm, L:1400 mm
for high voltage battery measurements, 600 VDC max., BT3563 and BT3562 only

Zero adjustment board (for L2100 only)

ZERO ADJUSTMENT BOARD 9454
for L2100 only

Cannot be used for zero adjusting the 9770 and 9771 Pin Type Leads

Measurement leads (for measuring batteries up to 60 V with BT3563, BT3562, or 3561)

CLIP TYPE LEAD L2107
A:150 mm, B:83 mm, L:1100 mm, 30 VDC

FOUR TERMINAL LEAD 9453
A:280 mm, B:118 mm, L:1360 mm, 60 VDC

LARGE CLIP TYPE LEAD 9467
A:300 mm, B:116 mm, L:1360 mm, 50 VDC

Mainly for Small Secondary Batteries (with very small terminals)

1.8 mm dia. single-axis type for measuring small electrodes

0.2 mm parallel pyramid-type pins for measuring at thru holes and sub-millimeter objects

PIN TYPE LEAD 9770
9770 tip shape
A:260 mm, B:140 mm, L:850 mm, 70 VDC

PIN TYPE LEAD 9771
9771 tip shape
A:260 mm, B:138 mm, L:890 mm, 70 VDC

Measurement leads (3561 only)

CLIP TYPE LEAD 9452
A:220 mm, B:197 mm, L:1360 mm

PIN TYPE LEAD 9455
A:280 mm, B:116 mm, L:1360 mm, 60 VDC

LARGE CLIP TYPE LEAD 9467
A:300 mm, B:116 mm, L:1360 mm, 50 VDC

29 mm diameter

PIN TYPE LEAD 9770
9770 tip shape
A:260 mm, B:138 mm, L:850 mm, 70 VDC

PIN TYPE LEAD 9771
9771 tip shape
A:260 mm, B:138 mm, L:890 mm, 70 VDC

Options (Interface Cables)

Interface (RS-232C and GP-IB) Connection cables

RS-232C CABLE 9637
9- to 9-pin crossover, 1.8 m

RS-232C CABLE 9638
9- to 25-pin crossover, 1.8 m
