17” Display HD/SD-SDI Analyzer

LV5980 Multi-SDI Rasterizer—Now With 3D-Assist!

NEW

LV5980 Shown with Optional Tabletop Stand.

The instrument accepts 2 HD/SD-SDI inputs and provides full test and measurement capabilities on a large 17 inch monitor. Full screen and combination displays of picture, waveform, vector, audio and status can be seen in various combinations. The instrument can be rack-mounted or used as a bench/table top instrument. Essentially, we have taken our popular LV5380 and equipped it with a 17” display—keeping the most popular features while making others optional. This is not just a monitor with small test capabilities; this is a full test monitor with large display capabilities!

LV5980 Features

- **Simultaneously Monitors 2 HD/SD-SDI Sources**
- **Displays Picture, CINELITE, CINEZONE, Waveform, Vector, 5-Bar, Audio and Status In Various Combinations.**
- **Options Include CINELITE/CINEZONE and 3D-Assist**
