MODEL GS-5800

This ultrasonic leak detector is ideal for locating leaks generated by pressure, vacuum, water, gas or air.

- Complete with Ultrasonic Leakage Detector, Ultrasonic Transmitter, rubber bottle plug with plastic tubing, 1/2" PVC pipe assembly for attaching to top of detector, 9V battery, and carrying case
- Leakage level is displayed by an LED bargraph and audible signal
- Ultrasonic Transmitter sends a 40 kHz signal which, when detected by the meter, indicates the location and magnitude of a leak
- Crystal time and oscillator circuit
- Includes soft carrying case

Detector Frequency Response: 20 to 100 kHz

Transmitter Frequency: 40 kHz

Dimensions: Detector: 10 x 2.8 x 1.1" (225 x 70 x 28mm)

Weight: 2 lb 14 oz
