

Thank you for purchasing the Skutch AS-703-SBC Promotion-On-Hold Module. This module was designed to work ONLY with the SBC 410 telephone. With this Module, all calls that are placed "ON HOLD", from any SBC 410, will hear the Promotion-On-Hold audio. When the call is re-answered, the audio will automatically disconnect.

• Music Cut Off Note

It is normal to hear a burst of music or promotion when a call is picked up from a hold condition. The maximum length of the burst should be under 1 second.

• Operation

When the AS-703-SBC is connected to power, the LEDs will flash, and audio will play over the telephone lines, three times then turn OFF. When a line is placed "ON HOLD", the corresponding LED on the AS-703-SBC will light indicating that audio is being coupled to that telephone line. The unit will play audio to all calls that are placed ON HOLD. Make sure that you adjust the level of the music to the proper level on the audio source.

• Troubleshooting Guide

No Audio but Lights Turn On, on the AS-703-SBC

- Make sure the Message Source is playing.
- Make sure the Message Source volume is turned up.
- Make sure the audio cable is connected. On CD players use the headphone jack and the supplied Black Audio Cord. On Digital players use the 8 ohm or Speaker out, and use the cable that came with the digital player.
- Try re-setting the STATION ID for each of the phones, start with 22 and go down from there. (11-22)

Music does not always shut OFF or turn ON.

- Re-set the STATION ID number for EACH telephone. Start with 22 and go down.

• Tech Support - 916-786-6186

If you have any problems getting the unit to work properly feel free to give us a call. Technical Support is available between the hours of 7:30 AM and 4:30 PM Pacific Time, Monday through Friday.
