To **PLAY** audio onto the telephone line, you just need to start/stop the audio source at the appropriate time. Both you and your customer will be able to hear the message. In order to eliminate any background noise from the office, it is recommended that you use a telephone with a **MUTE** feature.

NOTE: The T-21P will NOT hold the telephone line; this means that you HAVE to stay on the telephone line while you are playing your audio.

To **RECORD** audio from the telephone line, you just need to start/stop the recording device at the appropriate time. Both you and your customer will be recorded.
