

ENGLISH

Thank you for selecting the Sidewinder, a truly remarkable portable light. As with any professional tool, reasonable care and maintenance of this product will provide years of dependable service.

Please read these important operating instructions before using your Sidewinder.

BATTERIES

Install batteries by unscrewing the knob in the base of the tailcap. The tailcap is tethered to the bottom of the flashlight and does not need to be completely removed. Insert fresh batteries into the flashlight body (polarity is indicated on the outside of the flashlight) and replace the tailcap.

USING THE LIGHT

The integrated switch/selector is located on the side of the flashlight's adjustable head. The center pushbutton on/off switch operates with a single click for low power, fast double-click for strobe or push and hold to cycle through LED intensities. There are four positions indicated on the selector knob including one raised indicator. With the raised indicator up toward the lens, either the green or IR (depending on model) 5mm LED is selected. Pull the knob and rotate it clockwise (in 90 degree increments) to select: the red 5mm LED, the white (main) LED or the blue 5mm LED.

Clip can be mounted to either side of flashlight body and a lanyard hole is included in the tailcap.

STREAMLIGHT SIDEWINDER LIMITED WARRANTY

Streamlight warrants its Sidewinder (excepting batteries) will be free from manufacturing defects under normal use for 12 months after purchase. During the warranty period, at its sole discretion, Streamlight will repair or replace any defective part or product. **TO THE EXTENT ALLOWED BY LAW, STREAMLIGHT DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURCHASE.
