

Enabling Innovation in Education

Preparing engineering students for tomorrow's design challenges

Electrical engineering students need to understand complex circuits and electronic designs to develop next generation technologies. To help prepare students for tomorrow's design challenges, Tektronix is committed to support the unique needs of Education through various programs.

Education Discount	Tektronix makes it easier to invest in industry-leading test and measurement equipment by offering education discounts*. Just mention the Tektronix "education discount" to your account manager or Tektronix authorized distributor to receive the discount.
Classroom & Lab Resources	Tektronix offers a comprehensive set of classroom and lab resources that cover basic concepts to advanced techniques of test and measurement. The Tektronix Educator's Resource Kit offers six problem-based labs with accompanying instructor's guides, reference fact sheets, a basic oscilloscope concepts book and a training board to prepare students for real-world designs.
Industry Best Products	We give you the very latest generation of industry-leading test & measurement instruments, with capabilities that deliver the impeccable performance you need for today's designs

Education Discount Guidelines

- *Eligible education institutions must be: non-profit, degree-granting, post-secondary education, fully accredited by the state board or higher.
- This offer may not be combined with any other Tektronix offer, promotion or discount program except for TekSelect.
- The discount is not available on replacement or spare parts.
- Tektronix reserves the right to cancel this program at any time by posting the change or cancellation on its website.
