

A Window into Wireless Networks

Wi-Net Window gives you a clear picture

To install, expand or operate a wireless network you need to be able to see critical information about where the best location is for components, what access should be allowed and where or what security is in place. The new handheld Test-Um Wi-Net Window Analyzer gives you all the critical information you require and more! Take a look at all of its advanced features:

- Full alpha/numeric LCD display shows all information clearly and completely
- Picks up all IEEE802.11 wireless signal types: b and g
- Signal strength shown as a lighted bar and as a percentage for clarity
- Shows component name and channel of transmission
- Lists and logs all received wireless transmissions in the area for inspection with constant scanning
- Audible network pick-up signal
- Displays encryption condition on each wireless component
- Lists each signal as either an access point, an ad-hoc or Twin network type
- Ping function accesses IP addresses and determines an internet link condition
- Negotiates with network DHCP for component ID
- Shows router, DNS and target information
- Auto-off
- Lightweight: less than 8 ounces with batteries installed
