The Models 5050 and 5060, the latest design in 5000V Megohmmeters, are the most innovative product in their class on the market today. The features and functions incorporated in these products are the results of many years of analyzing how megohmmeters are used in everyday applications. The most advanced technology available has been applied to automate and facilitate the testing process for these applications.

Many features incorporated in the Models 5050 and 5060 (not found in any other megohmmeter on the market today) include automatic calculation and presentation of the Dielectric Absorption Ratio (DAR), Polarization Index (PI) and Dielectric Discharge (DD). The PI ratio times are also user defined. These new advanced megohmmeters display the test voltage, insulation resistance and the leakage current during and after the test. Capacitance of the sample and discharge voltage present at the test leads is displayed at the conclusion of the test.

The Models 5050 and 5060 are designed with the highest level of safety features built in. Both units are packaged in a rugged insulated case. The Models 5050 and 5060 incorporate test inhibit capabilities which will not allow test voltages to be generated if a live sample is detected. The test terminals are recessed to ensure operating safety. The test leads, rated for 5000V for both testing and measurement, are the only truly safety approved 5000V leads on the market today. The Models 5050 and 5060 can be operated from an internal rechargeable battery system or from AC line power.

The Model 5060 offers additional functionality in that an RS-232 port provides the ability to configure the units from a PC and run the test from the PC. Automatic documentation of test conditions and test results eliminates the need for writing down information. Test reports can be generated directly from the instrument to a printer or through the PC using the DataView® graphing and analysis software provided.

The list of features, functions and benefits goes on and on. If you are looking for a truly advanced 5000V Megohmmeter, the AEMC Models 5050 and 5060 are the best in class and available at an affordable price.
Features

- True Megohmmeter®
- Test voltage combinations of 500V, 1000V, 2500V and 5000V
- Insulation measurements from 30kΩ to 10,000GΩ (10TΩ)
- Selectable and programmable test voltage (40 to 5100V)
- Automatic calculation of DAR, PI and DD ratios
- Direct measurement and display of Capacitance and Leakage Current
- Display resistance, test voltage and run time
- Programmable test run times and PI ratio times
- Smooth and Alarm functions
- Automatic test inhibition (if live sample >25V)
- Automatic discharge and display of discharge voltage
- Large dual-display with time, voltage and measurements shown
- Bright blue electroluminescent backlight
- Programmable test voltage lock-out
- Programmable alarm setting
- Auto power-down when not in use
- AC or DC powered with rechargeable NiMH batteries
- Rugged, weatherproof field case
- Designed and built to IEC safety standards
- EN 61010-1, 1000V Cat. III
- Double Insulation
- CE Mark

Model 5060 includes these additional features:

- RS-232 interface for direct printing of results (serial or parallel output)
- 128kB memory for storing extensive field test data
- Configure instrument and run tests from a PC
- Includes DataView® software for data storage, real time display, analysis and report generation

Applications

- Test insulation on cables, transformers, motors, generators, insulators and wiring installations
- High resistance or absorption tests
- Spot reading tests
- Timed resistance measurements
- Dielectric Absorption Ratio (DAR) and Polarization Index (PI) tests
- Multi-layer insulation testing (Dielectric Discharge)
- Test old or water damaged installations over long time runs
- Motor insulation resistance measurements
- Computer controlled production line testing
- Predictive maintenance by storing results in PC for trend analysis
- User selectable voltage testing to provide application specific testing

Insulation can be subject to slow, gradual degradation over long periods of time, as well as sudden damage. The effects of moisture, dirt, corrosion, chemical penetration and even vibration can cause degradation of insulation. The effects of this degradation can easily be documented by using the automatic Polarization Index test feature standard on all models. Comparing the results over time will provide valuable information for preventative maintenance measures.
Key Functions – Models 5050 & 5060

Smooth Function – This function is very useful when the readings on the display are unstable and hard to read. It applies a digital filter to the displayed readings to smooth out the presentation. It does not effect the measurement or recording of data.

Alarm Function – Allows for the setting of a low limit resistance value for each test voltage, below which a buzzer will sound alerting you to a problem condition.

Selectable Voltage – Provides the flexibility to program an exact voltage for a specific test to any voltage from 40 to 5100V in 10V increments. The Model 5070 also allows for storage of three different voltage selections.

Test Voltage Lock-out – Gives the flexibility to limit the maximum output test voltage to any value from 40 to 5100V to protect delicate equipment from accidental exposure to excessive test voltages.

Timer Function – Program a test run time from one minute to 50 hours.

Key Functions – Model 5060

Record Function – provides the option to automatically store the data from a timed test at programmable intervals or to store the results of the test manually at the push of a button at the end of the test.

Print Function – Provides a direct print out to a printer of test results in a predefined format.

Model 5060 checking insulation resistance on feed cables to a three-phase motor.
Functional Displays

- Insulation Resistance Measurement displayed throughout the test. Time or test voltage can be displayed at the press of a button.
- Automatic calculation and display of DAR ratio
- Automatic calculation and display of PI Ratio
- Automatic calculation and display of DD Ratio on request at the conclusion of the test
- Capacitance Measurement from 1nF to 50µF displayed at the conclusion of each test
- Leakage Current Measurement from 1pA to 3000µA displayed during the test
- User selectable Test Voltage programming from 40 to 5100V
- Memory Function for Data Storage up to 99 objects (files), each containing up to 99 test results; the maximum number of records stored is 1500.

### MECHANICAL

| Dimensions | 10.63 x 9.84 x 7.09" (270 x 250 x 180mm) |
| Weight | 9.5 lbs (4.3kg) |
| Protection Index | IP53 |

### DISPLAY

| Backlight | Blue electroluminescent |
| Display Size | 4 x 2.25" (102 x 57mm) |
| Display | Digital; Two 4000-count displays, Analog bargraph: 33-segments |

### COMMUNICATION

| Report Print Out Direct to Printer | No | Yes: preset format |
| Storage of Readings over Time (R(t)) | 4kB memory | 128kB memory |
| Programmable Reading Intervals | 5 sec to 15 min | 5 sec to 15 min |
| Test Voltage Display | Yes | Yes |
| Elapsed Test Time Display | Yes | Yes |
| Real Time/Date Display | No | Yes |
| Test Voltage Lock-out | User programmed | User programmed |
| Storage of Test Results | 20 Readings | Stores over 1500 test results |
| Communication Port | – | RS-232 |
| PC Software/Report Generation | No | Yes DataView® (included) |
| PC Operation of Megohmmeter | No | Yes |

### SAFETY

| Safety Rating | EN 61010-1, 1000V Cat. III |
| Double Insulation | Yes |
| CE Mark | Yes |

(1) Inhibit voltage is selectable at 3, 10 or 20% of test voltage.
**DataView® Software for Model 5060**

Model 5060 easily configures and runs right from a PC.

### Features

**Configure all functions of the Megohmmeter Model 5060**

**Print reports of all test results**
- Select test voltage and run tests from your computer with a simple click and execute process
- Capture and display data in real time
- Retrieve data from the instrument's memory
  - Over 1500 insulation resistance measurements
- Display DAR, PI and DD ratios
- Plot graphs of manual and timed tests
- Include your analysis in the comments section with the report
- Store a library of setups for different applications
- Certification of results through report generation

### Minimum System Requirements

- Windows®98/2000/ME/XP or Windows®NT 4.0
- 128MB of RAM (256MB recommended) for Windows®98/2000/ME or Windows®NT 4.0, 256MB of RAM for Windows®XP
- 35MB of hard disk space (200MB recommended)
- CD Rom Drive

---

Clear and easy setup of all functions from one dialog box

Graphic viewing of insulation resistance during the test run

Test result status box displays complete test results in real time

Run test and display results from one dialog box.
Reports may be displayed on your PC and printed. Each report includes all test results in a tabular and graphic format, as well as operator and test site information. Comments typed in at time of storage will also be included.

A simple press of the download button from either the setup or run dialog boxes will show all test results stored in the Model 5060.

The DataView® software provides a convenient way to configure and control Megohmmeter tests from your computer. Through the use of two clear and easy-to-use dialog boxes, all functions of the Model 5060 can be configured and tests can be initiated. Results can be displayed in real time and stored in your PC. Reports may be printed along with the operator’s comments and analysis.

Each test will be stored as its own file and may be given its own unique file name.

DataView® is included with the Model 5060.
Accessories

Models 5050 and 5060 include soft accessory bag with one red, one blue and one black lead with integral 5kV rated hippo clips, one jumper lead for use with guard terminal, rechargeable battery, US 120V power cord and user manual.

Optional 1000V Lead set
Catalog #2119.55

Cable, PC RS-232, DB9 F/F 6 ft null modem cable for Model 5060 (included)
Catalog #2119.45

DataView® for Model 5060 (included)
ORDERING INFORMATION

**Megohmmeter Model 5050** (Digital, with Analog Bargraph, Backlight, Alarm, Timer, 500V, 1000V, 2500V, 5000V, Auto DAR/PI/DD) ................................................................. Cat. #2130.20
Includes soft accessory bag, one red, one blue and one black lead with integral 5000V rated hippo clips, one jumper lead for use with guard terminal, rechargeable battery pack, US120V power cord and user manual

**Megohmmeter Model 5060** (Digital, with Analog Bargraph, Backlight, Alarm, Timer, 500V, 1000V, 2500V, 5000V, Auto DAR/PI/DD, RS-232 w/DataView® software) ................................................................. Cat. #2130.21
Includes soft accessory bag, one red, one blue and one black lead with integral 5000V rated hippo clips, one jumper lead for use with guard terminal, one 6 ft RS-232 DB9/DB25 F/F to DB9/DB25 F/F Cable, rechargeable battery pack, DataView® software, US 120V power cord and user manual

**Accessories (Optional)**
- Cable, PC RS-232. DB9 F/F 6 ft Null Modem Cable ................................................................. Cat. #2119.45
- Cable, PC RS-232. DB9 F/F 6 ft (for serial printer) ................................................................. Cat. #2119.46
- Leads, set of three, 5 ft color coded – rated at 1000V max ........................................................ .. Cat. #2119.55
  one red, one blue and one black lead; one red, one blue and one black alligator clip
- Leads, set of three, 10 ft color-coded rated at 5000V max ......................................................... Cat. #2119.76
  one red, one blue and one black lead; one red, one blue and one black alligator clip;
one black test probe, one red test probe
- Leads, set of three, 10 ft color-coded rated at 5000V max ......................................................... Cat. #2119.85
  one red, one blue and one black lead with integral 5000V rated hippo clips
- Leads, set of three, 25 ft color-coded rated at 5000V max ......................................................... Cat. #2119.86
  one red, one blue and one black lead with integral 5000V rated hippo clips
- Leads, set of three, 45 ft color-coded rated at 5000V max ......................................................... Cat. #2119.87
  one red, one blue and one black lead with integral 5000V rated hippo clips
